-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 21 April 2009.  
2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.  
3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 4/21/09 has been entered.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 7, 8, and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Hayama (JP 11-157137). Note: The examiner has relied upon U.S. Patent # 6,532,078 as an English translation of Hayama (JP 11-157137).

As to claims 7 and 10, Hayama teaches in Fig. 2 a roll-shaped printing medium, T1, for use in a roll printer, comprising; a printing surface, the top surface of T1, on which one or more images are capable of being printed; a printing layer that is releasably adhered to a release layer, Col. 14 lines 5-13, the release layer for holding said printing layer, top surface of T1, wherein the releasably adhered printing layer, top

surface of T1, and the release layer are rolled together in a spiral shape for form a roll-shaped printing medium, as seen in Fig. 2.

The examiner would like to point out that claim is directed towards a roll-shaped printing medium, where the preamble defines an intended use for that roll-shaped printing medium, i.e. to be used in a roll-printer. (Note that the printer is not part of the claimed combination, but rather a mere intended use.) Therefore, the language directed towards how the roll-shaped printing medium is to be used in the roll-printer reads as intended use, i.e. how the roll-shaped printing medium is to be cut and printed in the roll-printer. The structure of the prior art described above is capable of performing the intended use of the roll-shaped printing medium being used in a printer. Said differently, the roll-shaped printing medium of Hayama, if place in the intended use printer, will be capable of being cut and printed according to claim 7 and 10.

As to claim 8, Hayama teaches in Fig. 2 a roll-shaped printing medium, T1, being used in a roll printer wherein said image forming portion, top surface of T1, extends substantially the entire longitudinal length of said print medium, T1, as seen in Figs. 16A-C.

### ***Response to Arguments***

Applicant's arguments filed 4/21/09 have been fully considered but they are not persuasive. As described above in the rejection of claim 7 and 10, the language directed towards how the roll-shaped printing medium is cut in the "for use" recitation of

a printer, reads as intended use and the prior art of Hayama, insofar as recited structure, is capable of performing.

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MATTHEW G. MARINI whose telephone number is (571)272-2676. The examiner can normally be reached on Monday-Friday 8:00 to 5:00.
